FRONTEND DEVELOPER

Alena Mitrofanova

mittralena@yandex.ru @lucubratiuncula github.com/amitrofanova

SUMMARY

Frontend developer with 4 years of experience building web apps. I have launched products from scratch (a B2B marketplace), improved performance, and designed resilient authentication.

WORK EXPERIENCE

Frontend Developer

March 2025 – Present

IT Center of the Tyumen Region citto.ru

- Raised Lighthouse scores to 90+ by setting up Nuxt SSR and semantic markup; Core Web Vitals improved by ~30%, with stronger SEO and organic traffic.
- Introduced Vitest and Playwright on ~80% of critical flows (e2e, unit, integration), cutting production bugs and regression time.
- Migrated a Gulp + Vue 2 app to Vite, Vue 3 Composition API, TypeScript, Nuxt 3, and Tailwind; builds became ~7× faster.
- Reworked a Vue 3 + TypeScript + Vuetify admin-panel generator used by 5 projects, so shared screens change in one place and support tickets dropped.
- Built an interactive portal for entrepreneurs on Vue 3, TypeScript, Nuxt 4, and Nuxt UI: dynamic questionnaires and a report builder for supervisory requirements.
- Building a MAX messenger chatbot admin on Vue 3, Quasar, and Vue Router: one entry point to dozens of chats and bulk messaging.

JavaScript (ES6+) TypeScript Vue.js 2/3 Nuxt.js 3/4 Pinia Vue Router REST API Webpack Vite CI/CD Git Vitest Playwright Quasar Vuetify Naive UI Nuxt UI PrimeVue Tailwind SCSS

Frontend Developer

November 2022 – December 2024

Build Board bb.market

- Joined at the idea stage and launched a B2B marketplace from scratch on Vite, Vue 3 (Composition API), Nuxt 3, and Pinia.
- Worked in Agile, contributed to architecture and estimates, reviewed code, and mentored junior developers.
- Delivered core flows: offers, warehouse, deals.
- Designed resilient auth with multi-accounting, tax-registry verification, passwordless SMS and OAuth, guest cart/likes merge, and analytics — which raised conversion from guest actions to sign-up.
- Shipped 10+ account and settings sections (organization data, notifications, sessions, address book), reducing support load.
- Added Nuxt i18n for 6 countries and internal translator tools so localization does not block developers.

- Enabled SSR with LCP under 1.5s and better indexing.
- Integrated Apollo Client (GraphQL) with TypeScript types generated from the backend schema.
- Introduced a UI library of 80+ components documented in Storybook.
- Covered key business logic with Vitest, Vue Test Utils, and Playwright.
