FRONTEND DEVELOPER

Alena Mitrofanova

mittralena@yandex.ru @lucubratiuncula github.com/amitrofanova

SUMMARY

Frontend developer with 4 years of commercial experience. I build Vue 3 and TypeScript web apps — from architecture through performance work and automated testing.

Work includes a B2B marketplace, legacy-to-modern stack migrations, SSR, GraphQL integrations, and component libraries.

I estimate work, mentor junior developers, and review code.

WORK EXPERIENCE

Frontend Developer

IT Center of the Tyumen Region | citto.ru
March 2025 – Present

- Raised Lighthouse scores to 90+ and Core Web Vitals by ~30%, which improved SEO and organic search traffic.
- Introduced automated testing with Vitest and Playwright, covering ~70% of critical flows (e2e, unit, integration) and cutting production bugs and regression time.
- Migrated a Gulp + Vue 2 app to Vite, Vue 3 Composition API, TypeScript, Nuxt 3, and Tailwind; builds became ~10× faster.
- Reworked a Vue 3 + TypeScript + Vuetify admin-panel generator used by 5 projects, so shared screens change in one place and support tickets dropped.
- Built an accessible (a11y) interactive portal for entrepreneurs from scratch on Vue 3, TypeScript, Nuxt 4, and Nuxt UI: dynamic questionnaires and a report builder for supervisory requirements.
- Building a MAX messenger chatbot admin on Vue 3, Quasar, and Vue Router: one entry point to dozens of chats and bulk messaging.

JavaScript (ES6+) · TypeScript · Vue.js 2/3 · Nuxt.js 3/4 · Pinia · Vue Router · REST API · Webpack · Vite · CI/CD · Git · Vitest · Playwright · Quasar · Vuetify · Naive UI · Nuxt UI · PrimeVue · Tailwind · SCSS

Frontend Developer

Build Bird | bb.market
November 2022 – December 2024

- Joined at the idea stage and launched a B2B marketplace from scratch on Vite, Vue 3 (Composition API), Nuxt 3, and Pinia.
- Delivered core flows: offers, warehouse, deals.

- Designed resilient auth with multi-accounting, passwordless SMS and OAuth, guest cart/likes merge, and end-to-end analytics — which raised conversion from guest actions to sign-up.
- Shipped 10+ account and settings sections (organization data, notifications, sessions, address book), reducing support load.
- Added Nuxt i18n for 6 countries and internal translator tools so localization does not block developers.
- Integrated Apollo Client (GraphQL) with TypeScript types generated from the backend schema.
- Introduced a UI library of 80+ components documented in Storybook.
- Covered key business logic with Vitest, Vue Test Utils, and Playwright, cutting regression time and production bugs.

JavaScript (ES6+) · TypeScript · Vue.js 3 · Nuxt.js 3 · Pinia · Vuex · REST API · GraphQL · Vite · CSS Modules · CI/CD · Vitest · Playwright · i18n · Storybook · Figma · Agile

SKILLS

Languages & markup

JavaScript (ES6+) · TypeScript · HTML5 · CSS3 · SCSS

Vue ecosystem

Vue.js 2/3 · Composition API · Nuxt.js 3/4 · Pinia · Vuex · Vue Router

Performance & accessibility

Web Accessibility (a11y) · SSR · Core Web Vitals

Data & APIs

REST API · GraphQL · WebSocket

Testing

Vitest · Vue Test Utils · Playwright

Tooling

Vite · Git · CI/CD · Docker

LANGUAGES

Russian Native

English B2

EDUCATION

2013

Tyumen State University

Institute of Mathematics, Natural Sciences and Information Technologies

Mathematical software and information systems administration
